# CHANGE ORDER

CONSTRUCTION SPECIFICATIONS INSTITUTE CHICAGO CHAPTER

## *Party with a Purpose*

Although the weather outside was frightful (burr!!), there was plenty of warm cheer at the annual Chicago Chapter CSI holiday fundraising party.

Special thanks to all those who attended, donated a raffle prize, bought raffle tickets, and to our event sponsor, [CertainTeed Ceilings](#). This combined effort helped us reach our fundraising goal to adopt a house to rehab this spring.

## UPCOMING EVENTS

**Specifying Windows, Doors, and Skylights Using Performance Standards**  
Technical Roundtable: Wednesday, January 10, 12-1pm

**AEC Career Path Detours, Adventures, and Surprises**  
Young Professional Event: Thursday, January 11, 6:00pm

**Deep Work: Rules for Focused Success in a Distracted World**  
Industry Roundtable: Wednesday, January 17, 12-1pm

**The 411 on: Reducing Your Material Footprint While Improving Occupant Health**  
Chapter Meeting: Tuesday, January 24, 5-8pm

**Meet the Reps: Rainscreen Wall Anchorage Products**  
Meet the Reps Roundtable: Friday, January 26, 12-1pm

**CSi2eye: Design and Construction Professional Registration Open**  
Technical Education Event: Thursday, March 15, 2018

## SAVE THE DATE

Building Enclosure Event: Thursday, February 22, Breakfast & Lunch Sessions

## President's Letter

Dear Friends,

Happy New Year to you all! I hope everyone had a chance to enjoy time with friends and family during the holidays. As I pause and reflect on the first half of my term as president of the chapter, I'd like to thank all of our members for your participation and enthusiasm this year. We have had impressive attendance at every meeting so far, and I am looking forward to getting to know even more of you as the year goes on. A special thanks to the board and committee members for their considerable commitment and dedication, with extra gratitude to Beth Winkler for her focus, patience, and devotion to the chapter.

I am happy to report that thanks to the generosity of our many contributors and holiday party raffle participants, we have met our fundraising goal for Rebuilding Together Chicago. See later in this newsletter for information on our "adopted" home, and please mark your calendars for our "Build Day" on April 28. Stay tuned for details on how to get more involved in the planning efforts. We are very excited to be a part of this meaningful event. Thank you for your support.

CSi2eye registration is now open to design professionals. As always this event is complimentary and open to members and non-members alike. I encourage you to take advantage of the unique learning environment that CSi2eye offers. These are not your standard lunch-and-learn presentations crammed into 10 minutes. We jokingly call it "speed-dating for specifiers," but it's really a relaxed environment for one-on-one attention from technical gurus representing an impressive array of manufacturers prepared to address your unique design concerns and considerations. Each year I've made unique connections to utilize for current and future work. If you are an A/E/C tasked with materials research, building design and detailing,

# The 411 on: Reducing Your Material Footprint While Improving Occupant Health

## Chapter Meeting: Tuesday, January 24, 2018, 5:00-8:00pm

### Presented by:

**John Mlade, LFA, WELL Faculty, LEED Fellow | Senior Associate | WSP USA**

**Arathi Gowda, AIA, AICP, LEED AP BD+C | Associate Director | Skidmore, Owings & Merrill LLP**

The building materials landscape is changing quickly and designers are taking a closer look at the Life Cycle Assessment of building products. As buildings become more efficient, the embodied carbon and environmental impact of building products is taking on a greater proportion of the total impact of design, construction and operations of buildings. Life Cycle Cost Analysis (LCCA) is a smart way to evaluate products across multiple environmental impacts and compare options to design and construct more efficient buildings.

**Time:** 5:00pm-8:00pm

**Location:** East Bank Club, 500 N Kingsbury Street, Chicago

**Cost:** Chicago CSI Members Complimentary, Nonmembers \$45

**Registration:** Due by January 16, 2018

**Continuing Education:** Available credit will be posted [online](#) once course is approved.

REGISTER NOW 

### Learning Objectives:

1. Understand basic concepts and definitions related to Environmental Product Declarations, LCCA, and trends in material ingredient and impact disclosure.
2. Understand the difference between LCAA and materials ingredient and health disclosures.
3. Know which tools and websites can be used to evaluate LCCA and materials disclosure comparisons.
4. Explain and anticipate new trends in material specifications.

### About the Presenters:

#### John Mlade, LFA, WELL Faculty, LEED Fellow

Since 2001, John has supported clients in shaping sustainability strategies that succeed for the environment, people and the bottom line. His professional focus has been on health in the built environment, from air quality through materials health and transparency, active design and biophilia. To that end, he is one of the first RESET ASPs, serves on the HPDC Technical Committee, is a trained Living Building Challenge auditor on behalf of ILFI, and promotes health through his roles as a Fitwel Ambassador and WELL Faculty. With John's support, both design team and manufacturer clients are able to navigate the healthy materials and transparency landscape including HPDs, the LBC Red List and leading product libraries and tools.

#### Arathi Gowda, AIA, AICP, LEED AP BD+C

Arathi Gowda leads SOM's Performative Design Group, charged with recommending integrated environmental solutions for SOM project teams worldwide. She has led sustainable design on projects in 35+ cities spanning global rating systems and climate zones. As an educator, Arathi has taught coursework on urban development and environmental impact at several universities. Trained as an architect, with Architecture and Planning registrations, she champions the environment at multiple scales, from master planning to architecture and interior design.

# AEC Career Path Detours, Adventures, and Surprises

Young Professional Event: Thursday, January 11, 6:00- 9:00pm

## Alternative Career Paths Utilizing Your AEC Degree

Have you ever wondered how someone got into such a unique career or just thought "What else could I do with my (AEC) degree?" It's time to find out!

Join us to hear stories from industry members with unconventional jobs and less-traveled career paths in the AEC industry. Find out how an architecture student ends up with a career in law; or discover the path an engineering graduate took to become a lighting designer.

Whether you are contemplating a career shift or curious about the paths taken, it will be a fun night of free food, drinks, and trips down memory lane as presenters share how they ended up where they are today.

**Location:** Exchequer Restaurant and Pub (226 S. Wabash Ave., Chicago)

**Cost:** FREE - includes pizza, salad, beer, and wine from 6-8pm. Social hour with cash bar to follow. Must be 21 or over to attend.

Students, young professionals, and the seasoned professionals that inspire them are all welcome.

REGISTER NOW 

### Sponsorship Opportunity:

- Event Sponsor: \$150
- Recognition at event - logo on signage and introduction.
- Logo and link on event webpage.
- Logo and link in newsletter event recap.

To reserve your sponsorship spot, please use the registration link and e-mail logo to [csichicagochapter@gmail.com](mailto:csichicagochapter@gmail.com).

## Lunchtime Roundtables

### Technical Roundtable: Specifying Windows, Doors, and Skylights Using Performance Standards

Wednesday, January 10, 12-1pm

**Presented by:** Jason Seals | Certification Manager | American Architectural Manufacturers Association

The North American Fenestration Standard - AAMA/WDMA/CSA 101/I.S.2/A440 - and its predecessors have all been milestones in a decades-long effort to provide a level playing field for objectively evaluating the performance characteristics and quality attributes of fenestration products regardless of their framing material. Key features make the standard a practical tool for architects and specifiers. This roundtable will provide you a better understanding of these standards and how to be successful in using them. [Complete event listing>>>](#)

**Location:** Pella Crafted Luxury, Chicago

**Continuing Education:** 1.0 AIA/CES/HSW LU

REGISTER NOW 

### Industry Roundtable: Deep Work: Rules for Success in a Distracted World

Wednesday, January 14, 12-1pm

**Moderated by:** Scott Conwell, FAIA, CSI, CDT | Director at International Masonry Institute

For many design and construction professionals, the ability to concentrate on important tasks is becoming more difficult as our work environments are packed with distractions.

This industry roundtable will be a discussion of the concepts put forth in the best-selling book Deep Work by Cal Newport. Participants are encouraged to read the book in advance of the roundtable, but it is not required. Start off the New Year with a commitment to master this important skill!. [Complete event listing>>>](#)

**Location:** DIRT Environmental Solutions Showroom, Chicago

**Continuing Education:** 1.0 AIA/CES LU

REGISTER NOW 

### Meet the Reps Roundtable: Rainscreen Wall Anchorage Products

Friday, January 23, 12-1pm

**Moderated by:** John Birazzi, AIA, CSI, CDT, LEED AP | Klein and Hoffman

**Representatives:**

Cascadia Clips | JR Hughes, Hughes Group

Knight Wall Systems | Tray Small, Eco Spec US

SMARTci | Brian Lewis, Arcspec US

This roundtable will give you the opportunity to get to know local representatives and learn about product selection and their applications in the market. Participants are encouraged to come prepared with questions in this open discussion format. [Complete event listing>>>](#)

**Location:** Klein and Hoffman, Chicago

**Continuing Education:** 1.0 AIA/CES LU

REGISTER NOW 

## Technical Education Event: Thursday, March 15, 2018

CSi2eye returns for a 5th year as manufacturer representatives and design/construction professionals will come together for the day to exchange technical knowledge and ideas.

CSi2eye is CSI Chicago Chapter's high-level technical education event. Representatives from top design & construction firms are brought together with product representatives for a day of education and exchange of technical knowledge. Through pre arranged eye-to-eye 20 minute scheduled meetings, CSI provides the platform for construction product manufacturers to get to know senior decision makers.

**Date:** Thursday, March 15, 2018

**Location:** East Bank Club, 500 North Kingsbury Street, Chicago

**Schedule:**

8:00am - 8:45am	Breakfast and Registration
8:45am - 11:45am	Morning Sessions with coffee break
11:45am - 1:30pm	Lunch with 1.0 CEU Presentation
1:30pm - 4:30pm	Afternoon Sessions with beverage break
4:30pm - 5:15pm	Cocktail/Appetizer Reception

**Lunchtime Presentation:** *[The New Reality of AEC Technology](#)*

Presented by: Danielle Dy Buncio | Founder & CEO | VIA Technik

As construction specifiers, designers and contractors, you are often the gate keeper or champions to what materials, processes, and technologies are used on a project – this presentation will explore what you need to know about emerging technologies impacting design and construction. We will discuss practical and value-based workflows and deliverables to leverage Virtual Design & Construction, Virtual Reality, Augmented Reality, Reality Capture. The rapid adoption of these technologies is opening new ways to communicate, make decisions, and problem solve in the design and construction phases. These interactive and immersive mediums can be leveraged to communicate design vision, develop a pre-construction plan, help reduce latency in decision making, convey scope for pricing, and more. The industry has tremendous opportunity to benefit by making innovation into our DNA.

**DESIGN & CONSTRUCTION TEAM INFORMATION**

Complimentary for Design and Construction Professionals. Half and full day attendance options.  
CSI membership is not required for this event.

**Manufacturer and Product Representative Applications are now closed.**

## Member Spotlight

Ray Hartshorne CSI, CCCA, AIA | Founding Partner, Hartshorne Plunkard Architecture

You can be forgiven for walking by the office of Hartshorne Plunkard Architecture (HPA) without noticing it. From the outside, this one-story brick storehouse looks like nearly every other vintage warehouse in Fulton Market, Chicago's neighborhood of recently-gritty meat packing warehouses just west of downtown. It isn't until you're buzzed in by the receptionist behind glass that your expectations change. The interior expands into an open workspace saturated with natural light from a raised ceiling that was invisible from the outside.

Ray Hartshorne started his firm in the late 1980's with partner Jim Plunkard. Early on, the two classically trained architects began working on small renovation projects. They quickly discovered that the adaptive reuse of historic structures can present a greater creative challenge than designing a building from scratch. "To succeed, you need to be able to recognize the spirit and intent of the original design and then build on that."

In 1997, they purchased an empty warehouse on Carpenter Street, in the heart of an active, yet slowing, food packing district called Fulton Market. As architects well-versed in how to reinvent old buildings for new uses, it was the perfect fit.

After doing research for the design of MDA City Apartments, the first boutique apartment building in Chicago, Ray saw a trend and in 2000 formed an interior design group to complement his architecture practice. With an in-

house interiors studio, the firm focused on placemaking and branding techniques to address the growth of millennial tastes and amenity-driven spaces. "I saw the relationship between vintage buildings, amenitizing, and the digital boom. There's a real hunger now for a place to work that feels authentic."

In 2011, working with Sterling Bay, Ray and his team designed the most pivotal project in Fulton Market's transformation: 1KFulton, the West Loop home of Google. Tech companies were quick to see the neighborhood's appeal as a unique place that catered to their desires more comprehensively than anywhere else in the city.

This year HPA celebrates 30 years of practice. A CSI member for --- years, Ray invites all HPA architects to attend CSI certification courses. "Having a staff that balances design with technical skill is important. CSI offers a great way to enhance our firm's technical training."

## Chapter News

### CSi2con

Over the last few months, we have been running a naming contest for a new design and construction consultant showcase event that we are developing with a target launch date of October 2018. The results from our event naming contest are in, and the winner is CSi2con!

The event committee chose from almost 40 entries to the contest - thank you to all that took the time to participate. Congratulations and thank you to Paul Burch with CPI Daylighting for suggesting the name.

The start of the New Year also initiates our first official steps in recruiting CSi2con participants. To recap, for CSi2con, we are looking for specialized construction industry consultants (acoustical, curtainwall, roofing, restoration, fire protection, IT, etc.) and managing directors, owners, and principals of companies that frequently partner up with said consultants to form project teams. The participants will be “set-up” on potentially 10 (or more) brief meetings over the course of a day. We throw in a few snack breaks, a delicious lunch with a CEU presentation, and a happy hour at the end. It’s a great opportunity to get several introduction meetings under your belt, all in one place, all in one day.

If you’d like to hear more or get involved, please contact John Birazzi ([jbirazzi@kleinandhoffman.com](mailto:jbirazzi@kleinandhoffman.com)) or Melissa Gibson ([mgibson@epsteinglobal.com](mailto:mgibson@epsteinglobal.com)).

## Chapter News

### 15th Annual Building Enclosure Event

Look for details and registration on our 15th annual Building Enclosure Event to come out very soon. The event will take place on Thursday, February 22, 2018 at Maggiano's in Chicago. Our speaker this year is industry leader Drury B. Crawley, Ph.D., AIA, Fellow ASHRAE, BEMP, Fellow IBPSA, who will be discussing the topic of energy modeling and its relationship to the performance of the building enclosure. Breakfast and lunch sessions will be available.

### We Selected a House!

**By: Guadalupe Casimiro**

We did it! On December 14, CSI Chicago members Rachel Nava, Kathy St. Joseph, Anne Waliczek, Francisco Rosas and I attended the Rebuilding Together Housewarming Party and read through many home descriptions and family stories. We selected the home of Thomas and Doris Malone, an elderly couple that has lived in the house for 49 years. It was listed as a 'Heavy' work house but I know our amazing chapter can handle it. It's suggested we get 25 volunteers so mark your calendars for National Rebuilding Day on April 28, 2018!

The planning for this exciting undertaking will begin soon and we will be sure to give updates along the way.

In addition to the fundraising at the holiday party, we would like to thank our contributors for helping us reach our fundraising goal and making this house adoption possible!

## Event Recap

### Holiday Fundraising Party - December 7, 2017

By: Kristin Henriksen, CSI, CDT | Sto Corp.

*Article continued from cover...*

The Greek Islands menu did not disappoint. The food was delightful and so were the party go-ers. Our ever enthusiastic and loud projecting MC, Jeff Tolle, did an outstanding job of keeping the crowd informed of the winners and entertained during the raffle fundraiser. At 7:30pm, when the party's designated time in the room was up, this lively crowd wasn't ready to call it quits on the fun so we simply moved across the restaurant to the bar where guests enjoyed drinks and conversation until they were finally ready to call it a night.

We'd like to thank those that participated as well as a huge **THANK YOU** to the event sponsor [CertainTeed Ceilings](#) for their generosity. This fundraising party raised over \$1,400 and will go toward the chapter's house adoption through Metro Chicago Rebuilding Together. We will be rehabbing this house on National Rebuilding Day on Saturday, April 28, 2018. Read more about the house chosen by the chapter in the [Chapter News section](#).

## Event Recap Chapter Meeting - November 28, 2017

By: **Jeremy T. Olsen, CSI, CCS, CCCA, AIA, LEED AP |Daylight Studio**

On November 28th, the Chapter inaugurated its first Contractor Engagement Night chapter meeting with an excellent presentation by [Michael Hanahan](#) on construction contracts, entitled “Construction Law Update: New AIA Contracts and Their Impact on Defects, Disputes and Insurance.” Michael is not only a partner at the law firm Schiff Hardin LLP, but is also trained as an Architect, so he was uniquely situated to present this topic to our membership.

Michael walked us through the significant changes to the 2017 iteration of the AIA construction contracts, most notably the A201 General Conditions of the Contract for Construction, which was heavily revised in the recent decennial review and revision process the AIA uses. We learned that there were significant changes to the Owner-Contractor communications protocols, that the Contractor has a new authority to refuse performance of minor changes, and that there is a new Insurance and Bonds Exhibit that applies to all the A100 series contracts and that provides more detailed insurance requirements than the previous version’s insurance paragraphs. The result is a document that is more clear, up to date with industry practices, and is more fair to all parties than past iterations. In keeping with our theme for the meeting of contractor engagement, Michael focused on how these changes affect contractors and their daily activities of procurement, construction contract management and risk allocation.

We also learned about the new revisions to the B101 Standard Form of Agreement Between the Owner & Architect. These changes impact the method of describing the initial information and scope of work, sustainable objectives, if any, insurance obligations, right to rely on digital data and BIM models, and how we define supplemental services and additional services. It was a valuable presentation to those of us who are architects or their consultants. One new provision in the B101 I especially appreciate is the refined definition of the Cost of the Work, which now clearly includes the reasonable value of the labor and materials supplied by the owner, since we still need to design for them.

Michael ably steered our capacity crowd through what can be a challenging topic (especially after a

## Event Recap

### Chapter Meeting - November 28, 2017 (cont.)

delicious dinner & dessert) on construction contract law with great anecdotes and a very clear delivery. Thank you, Michael! The power point slide deck for the evening can be found on our [Chapter website](#).

#### Contractor Engagement Month

The presentation by Michael Hanahan was but one part of a month-long emphasis by the Chicago Chapter on Contractor Engagement. Sadly, the chapter currently has surprisingly few members who are contractors or subcontractors, and we have identified the need to attract more contractors to our organization. We have so much to offer the contractor community, and they have so much to contribute to our mutual learning and networking, that we must make a concerted effort to

cater to their professional needs. To that end, the Contractor Engagement Committee approached several chapter members to invite and sponsor contractors to attend this event. As a result, we had a large number of contractors and subcontractors attend, many of whom had not attended a CSI Chicago event before. We are hopeful that they enjoyed their time with us, and will attend future events as well. To our current members, please be on the lookout for our 2nd Contractor Engagement Month in the fall and plan to assist us in the push to get as many contractors and subcontractors to attend and share their experiences with us.

We hope all the contractors who were able to attend the program enjoyed themselves. A big thanks goes out to all those who helped contribute to Contractor Engagement Night at our November Chapter Meeting:

#### Sponsors of Attending Contractors

Julie Montrose, All Weather Insulated Panels  
Holly Hirsh, Cultured Stone by Boral  
Howard Jancy, Custom Building Products  
Elaine Szot, Hilti  
Bill Zientarski, Hi-Performance Glazing Solutions  
Scott Conwell, International Masonry Institute  
Nicholas Cwikla, Malarkey Roofing Products  
Kira Rogatnik, Metl-Span  
Matt Reed, Parksite  
Pat Ruban, Percoa  
Chris Carpenter, Pella Windows & Doors  
Karen Swank, Pella Windows & Doors  
Kurt Moelman, RPI

Kristin Henricksen, Sto Corp.  
Lance Parker, Thornton Tomasetti

#### Contractor Engagement Committee

Jennifer Friedland, Certainteed Gypsum  
Scott Conwell, International Masonry Institute  
Pat Duffy, Advanced Building Products  
Jeremy Olsen, Daylight Studio  
Kathy St. Joseph, Lotte Advanced Materials

#### Thank you to the tabletops at the November chapter meeting:

Aristech Surfaces, Avonite and The STUDIO Collection  
BASF / Senergy Wall Systems  
Benjamin Moore  
Boral Stone Group  
North American MgO

## Hot Tip of the Month Clip Calculator

Submitted by: Rachel Nava, CDI, CDT | Epstein

Cascadia Windows is well-known as being the home of the world's first commercially available, all-fiberglass, Passive House Certified window, but did you know that we can also help with improving the thermal performance of exterior insulated wall assemblies?

The Cascadia Clip is a fiberglass thermal spacer designed to assist you in creating high performance wall, roof, or soffit assemblies by reducing the thermal bridging of traditional attachment systems. The Cascadia Clip has a very useful online design tool ([calculator.cascadiaclip.com](http://calculator.cascadiaclip.com)) that helps you determine the effective R value and allowable wind load of an assembly. It is

simple to use, featuring a series of drop down menus to allow you to select the various aspects of your design. The tool is backed up with stamped engineering letters outlining the design criteria for the thermal modelling and structural calculations, and which can be used as submittals to guarantee performance. For more information about this helpful tool, please contact Paraic Lally at 604 833 8083 or [plally@cascadiawindows.com](mailto:plally@cascadiawindows.com)

Back up Wall Structure	3 5/8" Steel Stud - 18ga
Batts in Cavity?	No
Exterior Insulation R-Value per Inch	R-4.2/inch
Fastener Type	2 x Stainless Steel
Clip Horizontal Spacing	16 in
Cladding Dead Load (Weight)	5 psf
Exterior Insulation Depth / Clip Size	3 1/2 in
Clip Vertical Spacing	48 in
<input checked="" type="checkbox"/> I wish to specify clip size and vertical spacing	
<a href="#">Print This</a>	
<b>Results</b>	
<b>Full Wall Effective Thermal Performance</b>	
U-Value [Btu/(ft <sup>2</sup> *F*hr)]	0.058
R-Value [(ft <sup>2</sup> *F*hr)/Btu]	17.3
RSI-Value [(m <sup>2</sup> *K)/W]	3.05
USI-Value [W/(m <sup>2</sup> *K)]	0.33
<b>Wall Structural Capacity</b>	
Maximum Allowable Wind Load (kPa)	3.4
Maximum Allowable Wind Load (psf)	70.2

## Institute and Regional News

### Construction Specifications Institute (CSI) 2018 National Election - Call for Nominations

Each year, CSI's Nominating Committee vets and presents a slate of qualified nominees to serve on the Board of Directors, that the membership votes on in the Spring election.

This year, the Nominating Committee is requesting applications from members who are interested in serving on the board in one of this year's open positions. Please consider applying or nominating a great candidate to serve on the CSI Board of Directors!

The three positions to be elected by the full membership this spring, for a term starting July 1, 2018, will be:

- CHAIR-ELECT ([view job description](#))
- TREASURER ([view job description](#))
- DIRECTOR-AT-LARGE ([view job description](#))

**Submission Deadline:** All members interested in being considered for one of these board positions should submit their online application by Monday, January 8, 2018.

**Timeline:** Applicants will receive a response to their applications by late February 2018. The election will take place in March 2018.

[APPLY HERE](#)

If you have any questions related to how to apply for a position or questions on the system, please contact: [election@csinet.org](mailto:election@csinet.org).

## Institute and Regional News (cont.)

### North Central Region Conference - Registration is now open!

Visit the NCR website at [www.csi-northcentralregion.org](http://www.csi-northcentralregion.org) for general information, schedule, sponsorship, and trade show, accommodations, and registration.

### CONSTRUCT 2018 - Call for Speakers

CONSTRUCT is the only dedicated national event specifically designed to provide the commercial building team real-world, practical products and education solutions. Our participants design, build, specify, engineer, renovate and operate in the built environment and are hungry for knowledge. They are looking for quality content that engages them and provides them with real world-solutions that they can take home and implement immediately.

Now is your chance to turn what you've learned into a unique presentation that will build your reputation and improve the construction community. Be a part of CONSTRUCT 2018, submit a proposal today!

**Submissions will be accepted until January 23, 2018. [LEARN MORE.](#)**

### CCPR Study Group Q&A - Webinar

**Fri, Feb 9, 2018 12:00 PM - 1:00 PM EST**

Please join the meeting from your computer, tablet or smartphone: <https://global.gotomeeting.com/join/302129365>

You can also dial in using your phone: United States: +1 (646) 749-3131 Access Code: 302-129-365

First GoToMeeting? Let's do a quick system check: <https://link.gotomeeting.com/system-check>

The Great Lakes Region has set up a conference call for Friday February 9th, 2018 at 12:00pm EST. The purpose of this call is to promote interest in a study group for CCPR testing preparation. We have three interested people currently from networking, etc.

Once this webinar has happened, times will be set for 7 classes going forward. They will start on Friday February 16th, and occur each week until Friday March 30th. Time of the call TBD----we will see if there are multiple time zones involved. If there is interest from Mt. and West Coast time zones, we accommodate and adjust time accordingly. It will be virtual in nature and open to all across the country.

This is a certification that has traditionally not had an organized study group to support CSI members and CDT holders from the manufacturing community that want to move to the next level.

Questions, please contact Thad Goodman, FCSI, CCPR at [thadg@nationalgypsum.com](mailto:thadg@nationalgypsum.com)

## Insulated Cladding Systems

Wall systems from BASF can help your project succeed. With striking appearances, featuring the look of multiple claddings. Up to R-45 continuous insulation, an integral air/water-resistive barrier and moisture drainage. BASF EIFS and insulated stucco systems comply with building code requirements, and are supported with extensive NFPA 285 assembly testing. They offer high performance at a cost that works for your new construction or restoration project.

Let BASF help you with your building science and code compliance homework, so you can focus on giving your clients the building they want.

## Division 01: The Project Road Map

By: Cherise Lakeside, CSI, CDT, SCIP

I have one goal with this blog. One crazy idea that if I can get some people to read this, they will change the way they work.

That goal? READ the DIVISION 01 GENERAL REQUIREMENTS in the specifications of your project.

I know what some of my friendly compatriots are going to say when they see that sentence. They are going to say “Cherise, that’s a no brainer!” I mean, really, am I writing a blog about something so simple? Damned right I am.

A few years ago, I wrapped up almost six years of working for an MEP engineering firm. This was a very unique opportunity to work on yet another side of the fence in AEC: to see how the other half lives. It was an opportunity to see why some of the breakdowns I saw were happening between the Architect and the Consultants.

It was both an eye opening experience and a wake-up call. [Read the full article on Let's Fix Construction>>>](#)

## The Closeout Wolf Point West Tower

Submitted by: Patrick Duffy, CSI, CDT, CCPR | Advanced Building Products / Greco Railings

Greco Aluminum Railings provided the railing systems for the new downtown Wolf Point West Tower, the first residential tower to be built at the confluence of the North, South and Main branches of the Chicago River. The high-rise apartment building has achieved LEED Silver Certification, demonstrating a commitment to reduced use of natural resources.

BKL was the lead architect for the 48-story mixed-use master plan developed by Pelli Clarke of Pelli Architects. Greco designed, manufactured and supplied 4,600 lineal feet of custom railing for the high-profile project to James McHugh Construction of Chicago. Greco worked closely with the design team to ensure the glass railing element was fabricated to work harmoniously with the glass façade of the building.

“Our engineered glass railings provided an integrated design with the building envelope” says Jim Ellsworth, president of Greco Aluminum Railings USA, Inc. “The custom railing design provides tenants with spectacular unobstructed views of the river and city skyline. The slab edge mounted system included a matching spandrel glass panel and horizontal decorative exterior aluminum tubes allowing the system to merge harmoniously with the window wall and also give each tenant complete usage of their entire balcony surface.

The tower includes 509 rental units with a mix of studio, one, two and three bedroom floor plans, and features inset balconies with three dimensional, horizontal bands of aluminum tubes that provide additional texture and interest. Taking luxury living to the next level, Wolf Point West offers cutting-edge amenities such as an outdoor pool and sundeck, a top floor fitness center, a game room, fire pits, direct access to a river walk, and even an indoor-outdoor dog lounge.
